

Can you count on from the starting number to find how many mini-beasts there are?

1 2 3 4 5 6 7 8 9 10

$$4 + \begin{array}{c} \text{fly} \\ \text{fly} \\ \text{fly} \\ \text{fly} \end{array} = \square$$

$$6 + \text{butterfly} = \square$$

$$3 + \begin{array}{c} \text{beetle} \\ \text{beetle} \\ \text{beetle} \\ \text{beetle} \end{array} = \square$$

$$2 + \begin{array}{c} \text{ladybug} \\ \text{ladybug} \end{array} = \square$$

Challenge – Can you make up some of your own counting on questions?
