

Challenge!

Find the sum of each pair of two-digit numbers.

5 tens and 4 ones + 4 tens and 3 ones = _____

$71 + 23$	$7 \text{ tens} + 2 \text{ tens} = \underline{\hspace{2cm}}$ $1 \text{ one} + 3 \text{ ones} = \underline{\hspace{2cm}}$	$\underline{\hspace{1cm}} \text{ tens} +$ $\underline{\hspace{1cm}} \text{ ones} = \underline{\hspace{2cm}}$
-----------	---	---

	6	4
+	2	1

Mr Jones has 32 whiteboard pens and 17 rulers.
How many items does he have in total?

Asma calculates the answer to this addition.

$$45 + 32$$

She works it out like this:

Do you agree with her answer? Explain why.

Show Asma how to find the correct answer using a part-whole model.

Then, show Asma how she could have checked her answer using a different method.
