Fraction of an amount - find the whole
(1)

Complete the calculations.

What is the same about the calculations?
What is different?
a) Mr Hall walked $\frac{2}{3}$ of the way from his house to work. He walked 6 miles.

How far is it in total from his house to work?

$\square$
b) Jenny cycled $\frac{4}{5}$ of the way from her house to work. She cycled 16 miles.
How far is it in total from her house to work?

$\square$
(3) Calculate the missing wholes.

(4)

Fill in the missing information.
a) $\frac{1}{3}$ of $\square$ $=20$
b) $80=\frac{4}{10}$ of $\square$
$\square$
$\square$
$\square$

$$
8=\frac{4}{10} \text { of } \square
$$

$\square$ $=120$

6 Jack poured $\frac{7}{10}$ of a tin of paint into this jug.

How many millimetres of paint are left in the tin?

7 Complete the calculations.

$$
\begin{aligned}
& 4=\frac{10}{15} \text { of } \square \\
& 15=\frac{75}{100} \text { of } \square \\
& 1=\frac{250}{2,000} \text { of } \square
\end{aligned}
$$

Compare your method with a partner. What do you notice?
