

## Maths: Place Value – Adding 1s, 10s and 100s

Hello Class 3, it's Miss Brack here and I need your help!  
Since we have not been at school over the Christmas holidays, I have forgotten how to add hundreds, tens and ones – Oh no!

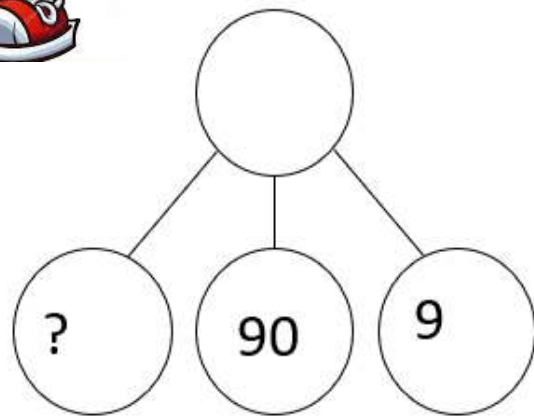

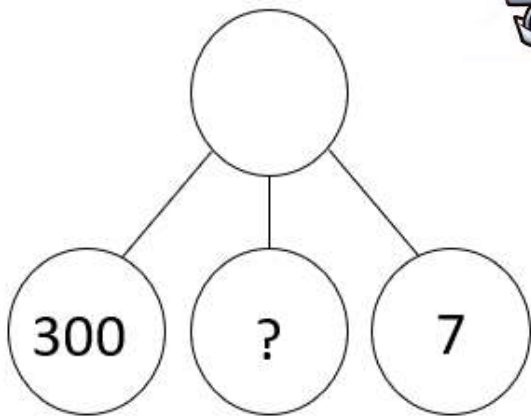

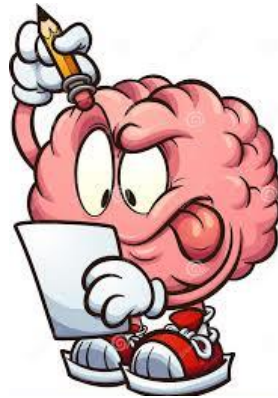

Can you help me by using your amazing mental maths skills to complete these part-whole models? All you need to do is copy these questions and answer them in your home learning books!

For these last 2 questions can you think of what the missing numbers could be? How many answers can you think of?

Thank you so much for your help Class 3 – I knew you'd be able to help me!

Miss Brack
