

## Tuesday Maths Challenge

L.O: To multiply by 4.

Which part below does not show counting in fours?

$4 + 4 + 4 + 4$				
	<table border="1"><tr><td>4</td><td>4</td><td>4</td></tr></table>	4	4	4
4	4	4		

Explain why.

Dory says:

“ $7 \times 4 = 28$ . If I swap the numbers around and complete the multiplication  $4 \times 7$ , I will get the same answer.’

Is Dory correct? Draw a picture to help you explain your answer.
