

**Monday 9<sup>th</sup> January 2023**

Dear Parent/Carer,

**Maths After School 1:1 Tuition Year 6**

We are excited to share that we have prioritised 1:1 maths intervention, using Third Space Maths, for our Year 6 pupils for 1 hour per week after school. This intervention **will start this week on Wednesday 11<sup>th</sup> January 3.30-4.30pm and then on a Monday 3.30-4.30pm every week thereafter**. It will take place online in school, where children will log on and meet their tutor. The programme is designed to help each child to make accelerated progress from their starting points in maths. This could be focusing on closing gaps that some children have to targeting others to achieve greater depth within their maths work.

We feel this is an excellent opportunity for pupils to have additional tailored teaching to meet their individual and personalised needs and we do hope that you too will see the benefit of this 1 hour per week after school for your child.

As this intervention comes with a substantial cost, the school will be funding this and there will be no cost to parents for this additional tuition. We do however ask for a commitment that children do attend this session each week consistently.

Although we do not anticipate any child not attending this session, if anyone does have any issue with their child attending the after school maths intervention then please get in touch and speak to Miss Croxford as soon as possible.

Yours sincerely,

Mrs Ashton

Executive Headteacher
